Non-Members - \$20 (with reservation) \$30 (pay at the door)
Pizza and Soda Included Only

INSTRUCTOR: Mark Jackson, Steven Winter Associates, Inc.

DESCRIPTION:

Buildings which are not accessible are not sustainable. Settlements and other legal agreements reached between developers and the courts have resulted in the substantial renovation of newly constructed buildings to incorporate legally required accessibility. If a newly constructed sustainable building must be substantially renovated to incorporate accessibility, how truly sustainable is it? Achieve accessibility compliance during design development and construction to produce a truly sustainable project.

This session is intended for engineers, architects, landscape architects planners, facility managers & building owners. It is applicable to LEED Pros.

KEY WORDS:

Accessibility, scoping, technical criteria, visitability, walkability, universal design

LEARNING OBJECTIVES:

1. To be sustainable - a building must, also, be accessible. How does this concept relate to the design of sustainable buildings?
2. What is the basis for an accessible building?
3. Learn how to incorporate accessibility in the sustainable design process
4. Learn key examples of accessible design practices which promote sustainability

OTHER INFORMATION:

Attendees to this session will be awarded 2.0 AIA LU/ HSW/ PDH/ LA CES/ GBCI CE – Contact Hours, *which are accepted by New York State & New Jersey for Professional Engineers, Registered Architects, Landscape Architects and Land Surveyors* The course is, also USGBC approved, courtesy Stephen Winter Associates.

AIA Course Designation: 185ACC
